

TruLight™ 5000 Surgical Light

Light for all occasions

Enhancing outcomes for
patients and their caregivers:

Hill-Rom

The Future Requires Versatility

The desire to set new standards with innovative solutions is the guiding force behind product development at Trumpf Medical. The latest OR Lighting generation, TruLight™ 5000, is a result of this approach. Combining adaptability with efficiency, the TruLight™ 5000 Surgical Light provides you with the ease of use and the investment security that you require to future-proof your hospital.

Your advantages at a glance:

Individual adjustment

Adaptable color temperature and pattern size – to meet every surgical procedure

Intelligent versatility

An illumination level that is automatically optimized for different work situations – thanks to ALC Plus

Ease of use

Sterile adjustment of the light intensity using capacitive sensors located at the control grip and the light head

Communication

Optimal communication platform – through the integration of video systems for digital transmission in HD format

Efficient technology

Low heat and extremely high light output due to the special lens/LED combination

Environmental compatibility

Low power consumption – thanks to a durable LED light system that does not contain any heavy metals

Individual Adjustment

Every generation has an edge over the previous one. Similarly, in the case of the TruLight™ 5000 Surgical Light, proven functionality meets technological advancements that have significant impact on the quality of work in the OR. Equipped with adjustable color temperature and pattern size adjustment, the TruLight™ 5000 Surgical Light offers an exceptional performance range that benefits you during daily use.

Contrast optimization due to color temperature adjustment of 3,500 to 5,000 K

Improved contrast

With a color rendering index of up to Ra 96, the variable color temperature adjustment ensures higher contrasts even in the most varied tissue ranges.

High intensity

Innovative energy management and the adaptation of the pattern size to the wound area dimension ensure optimal visual conditions in the surgical site, making it ideal for long operations.

High security of investment

The TruLight™ 5000 Surgical Light architecture makes it easy to adjust the color temperature at a later time.

Benefits

Improved ergonomics due to individual contrast optimization and a high level of investment security for the future

Perfect Cooperation

The optics of the TruLight™ 5000 Surgical Light System are based on the most precise research and long-term experience. The result is a highly developed LED multi-lens matrix. Its special lens geometry and arrangement of the LED elements in the light head result in excellent light quality and maximum efficiency.

Bundled light power

The arrangement of the LEDs in the TruLight™ 5000 Surgical Light ensures a homogeneous light-emitting surface, and enables almost shadow-free conditions.

Best yield

Due to the complete casing of the LEDs within Trumpf Medical's specific convergence lenses, the light of each individual LED is completely captured and used precisely.

Your advantage

More power and efficiency for a homogeneous light distribution on the surface and depth

Unique in Comfort

Ergonomics are critical to clinical staff. The TruLight™ 5000 Surgical Light meets this demand with a wide range of intelligent features, creating more time for what is important – the patient.

Your advantage

Comfortable operation and maximum illumination level at working distances even beyond 1 m

Fully automated

If the light head is moved, the integrated movement recognition sensor of the Adaptive Light Control Plus (ALC Plus) measures the distance to the wound area and adjusts the illumination automatically.

Easily adjustable

With the integration of capacitive sensors in the sterile hand grip of the light head, the Sterile Light Control (SLC) concept permits quick and sterile control of light intensity.

Test the two features ALC Plus and SLC at www.trumpfmedical.com/en/trulight5000

Versatile Use

Models for every application

For optimal use in different clinical environments, the TruLight™ 5000 Surgical Light is available in different versions and offers impressive versatility combined with investment protection.

Low-ceiling version: complete mobility in rooms with height limitation

Mobile version: for emergencies or supplemental use

Wall-mounted version: ideal for special infrastructure conditions and procedures

Sophisticated communication

The TruLight™ 5000 Surgical Light systems can be equipped with our high-quality TruVidia™ Camera and monitor solutions, which can be incorporated into the Trumpf Medical high-end video system with full HD quality.

Your advantage

Platform for high-end communication as well as flexible use in different applications

Technical Data and Services

The Trumpf Medical services: excellent support all round

Hill-Rom is a leading global medical technology company with more than 10,000 employees worldwide. We partner with health care providers in more than 100 countries, across all care settings, by focusing on patient care solutions that improve clinical and economic outcomes in five core areas: **Advancing Mobility, Wound Care and Prevention, Patient Monitoring and Diagnostics, Surgical Safety and Efficiency and Respiratory Health**. Our innovations ensure caregivers have the products they need to help diagnose, treat and protect their patients; speed up recoveries; and manage conditions. **Every day, around the world, we enhance outcomes for patients and their caregivers.** Learn more at hill-rom.com.

Trumpf Medical, part of Hill-Rom, is distinguished by high-quality German engineering standards and offers innovative products to improve efficiency and safety in the OR, ICU, and in other clinical environments throughout the care sector. With our customers' requirements as our benchmark and innovation as the foundation of our success, Trumpf Medical delivers total solutions to fit your clinical care needs.
